1.1 Project Overview

EduCampus360 ERP is a comprehensive School Management System designed to modernize and simplify educational institution management through a centralized digital platform. The system connects administrators, teachers, students, parents, and support staff within a unified environment that improves communication, operational efficiency, and academic management.

The platform replaces traditional manual school operations with an organized digital workflow that reduces paperwork, improves transparency, and provides real-time access to school activities and student information. The application includes role-based dashboards and permission-based access so that users can access only the features relevant to their responsibilities.

The solution includes integrated modules covering admissions, academics, attendance, examinations, fees, transport, hostel, payroll, communication, reports, library, inventory, and operational management. All modules work together inside a centralized platform that simplifies institution-wide administration and reporting.

The application is developed as a responsive web-based platform with Progressive Web App support, allowing access from desktops, tablets, and mobile devices.

1.2 Objectives and Goals

Primary Objectives:

1. Replace manual school administration processes with automated digital workflows.
2. Improve communication between school management, teachers, students, and parents.
3. Centralize academic and operational data management.
4. Reduce repetitive administrative tasks and improve efficiency.
5. Provide secure, role-based access to institutional data.

Specific Goals:

1. Simplify admissions, attendance, and examination workflows.

2. Improve visibility into student performance and school activities.
 3. Automate fee collection and financial reporting.
 4. Provide real-time reporting and analytics for administrators.
 5. Create a scalable ERP platform suitable for schools of different sizes.
 6. Improve operational transparency across all departments.
-

1.3 Key Benefits

For Educational Institutions:

- Centralized management of all school operations
- Reduced paperwork and administrative workload
- Improved reporting and analytics visibility
- Better coordination between departments
- Faster access to operational data

For Teachers:

- Easy attendance and homework management
- Simplified examination and marks entry
- Better classroom organization
- Access to student academic information
- Improved communication with parents

For Parents:

- Real-time child performance tracking
- Easy access to attendance and fee information
- Instant school notifications and announcements
- Improved communication with teachers and administration

For Students:

- Access to homework, exams, and timetables
 - Better visibility into academic progress
 - Access to notices and announcements
 - Improved digital learning interaction
-

1.4 Scope of the System

Core Functional Areas:

1. Academic Management
2. Student Lifecycle Management
3. Attendance Management

4. Examination Management
5. Fee and Financial Management
6. Communication Management
7. Reporting and Analytics
8. Transport and Hostel Management
9. HR and Payroll Operations
10. Inventory and Library Management

User Categories:

- Super Administrators
- School Administrators
- Teachers
- Students
- Parents/Guardians
- Support Staff

Technical Scope:

- Web-Based ERP Platform
 - Progressive Web App Support
 - Mobile Responsive Interface
 - Role-Based Authentication
 - Real-Time Synchronization
 - PDF and Excel Export Support
-

2. INTRODUCTION

2.1 Purpose of the Document

This document explains the EduCampus360 ERP platform in a clear and human understandable format from an end-user perspective. It helps stakeholders understand how the system works, who uses it, and how different modules support educational institution management.

The document serves as a structured guide for administrators, teachers, students, parents, operational staff, and project stakeholders who require an understanding of the system's features, workflows, and functionality.

2.2 System Overview

EduCampus360 ERP is a web-based School Management System designed to manage academic, administrative, and operational activities within a centralized platform.

The system includes:

- Student admissions and enrollment
- Academic and syllabus management
- Attendance tracking and homework management
- Examination and result processing
- Fee collection and finance management
- Communication and notifications
- Hostel and transport administration
- Reports and analytics

The platform acts as a digital school administration environment that improves operational efficiency, reduces manual work, and provides real-time visibility into institutional activities.

2.3 Target Audience

This document is intended for:

- School Administrators
 - Teachers and Academic Staff
 - Students
 - Parents and Guardians
 - Accountants and Finance Staff
 - Transport and Hostel Coordinators
 - Project Stakeholders and Management Teams
-

3. USER ROLES AND RESPONSIBILITIES

3.1 Role Management

Role Management controls how users interact with the EduCampus360 ERP platform. It defines permissions, module access, and operational responsibilities for each user type.

The system uses role-based access control to ensure users can access only the modules and operations relevant to their responsibilities. This improves security, workflow management, and operational clarity.

What Role Management Does:

1. Creates operational roles dynamically.
2. Controls module-level permissions.
3. Defines user access and workflows.
4. Restricts sensitive operations to authorized users.
5. Maintains secure system access.

Why Role Management Matters

- Improves operational security
- Simplifies navigation and workflows

- Prevents unauthorized access
 - Supports scalable organizational growth
 - Maintains operational clarity
-

3.2 Super Administrator

The Super Administrator is the highest-level user in the system and manages platform-wide operations.

Responsibilities:

- Manage school tenants
- Configure platform-wide settings
- Manage system users and permissions
- Monitor platform activity and reports
- Control access to sensitive system operations

Key capabilities:

- Full access to all modules and reports
 - Multi-tenant management access
 - Advanced permission management
 - Platform-wide analytics visibility
-

3.2 School Administrator

The School Administrator manages school-level operations and daily workflows.

Responsibilities:

- Manage admissions and enrollments
- Configure classes, sections, and subjects
- Manage attendance and examinations
- Oversee fee management and reports
- Manage operational and academic workflows

Key capabilities:

- Access to academic and finance modules
 - School-level reporting and analytics
 - Teacher and student management access
 - Operational configuration management
-

3.3 Teachers

Teachers manage classroom and academic activities.

Responsibilities:

- Mark attendance
- Assign homework and assignments
- Enter examination marks
- Monitor student performance
- Communicate with parents

Key capabilities:

- Attendance and homework access
 - Exam management tools
 - Student performance visibility
 - Timetable access
-

3.4 Students

Students use the system to access their academic information.

Responsibilities:

- View attendance and timetable
- Access homework and assignments
- Check examination results
- Monitor academic progress

Key capabilities:

- Student dashboard access
 - Homework and exam visibility
 - Notice and announcement access
 - Academic tracking features
-

3.5 Parents / Guardians

Parents use the system to monitor child academic activities and school updates.

Responsibilities:

- Monitor attendance and academic progress
- Track fee status and payment history
- Receive school notifications
- Communicate with teachers

Key capabilities:

- Parent portal access
 - Attendance and fee visibility
 - Result monitoring access
 - Communication features
-

3.6 Support Staff

Support staff manage operational and administrative activities.

Typical Roles Include:

- Accountant
- Librarian
- Hostel Warden
- Transport Coordinator
- Reception Staff

Responsibilities:

- Operational data management
 - Transport and hostel administration
 - Inventory and library operations
 - Financial and administrative support
-

4. SYSTEM ADMINISTRATION

The System Administration module provides centralized platform management and operational monitoring capabilities. This module is accessible only to superadmin users and helps manage tenants, users, permissions, and platform-wide settings.

4.1 System Dashboard

The System Dashboard acts as the central monitoring panel for the platform.

Key Features:

- Tenant activity monitoring
 - System performance analytics
 - User activity tracking
 - Operational alerts and notifications
 - Platform statistics and reports
-

4.2 Manage Tenants

This module manages school tenants within the platform.

Functionality Includes:

- Tenant creation and activation
- School branding configuration
- Subscription management
- Tenant lifecycle management
- School-specific settings

4.3 Manage Users

This module controls platform-level users and permissions.

Functionality Includes:

- User registration and management
- Password and authentication controls
- Account activation and deactivation
- Role assignment and permission tracking

4.4 Roles & Permissions

This module manages role-based access and operational permissions.

Functionality Includes:

- Role creation and editing
- Permission assignment
- Access restriction management
- Role hierarchy configuration
- Permission auditing and tracking

5. FUNCTIONAL MODULES

5.1 Modules

Modules represent the main operational areas within the School Management System. Each module groups related features together to improve navigation, workflow management, and scalability.

The system displays modules dynamically based on user roles and permissions. Users only see the modules relevant to their responsibilities, improving usability and operational security.

5.2 Dashboard

The Dashboard module serves as the primary landing page after login and provides a centralized overview of school operations.

Key Features:

- KPI statistics and summaries
 - Attendance analytics
 - Financial overview
 - Notifications and alerts
 - Quick action shortcuts
 - Performance charts and reports
-

5.2 Masters

The Masters module acts as the foundational configuration area of the system.

Submodules Include:

- School Details
- Academic Years
- Classes and Sections
- Subjects
- Staff Management
- Subject Allocation
- Syllabus Management

This module ensures proper configuration of academic and operational structures used throughout the platform.

5.3 Academics

The Academics module manages academic workflows and student lifecycle operations.

Submodules Include:

- Admissions
- Holidays
- Teacher Allocation
- Promotion Management
- Inquiry Management

This module simplifies academic administration and improves institutional workflow management.

5.4 Students

The Students module manages student profiles and enrollment information.

Key Features:

- Student registration and profile management
 - Student transfers and promotions
 - Bulk import functionality
 - Search and filtering options
 - Academic and personal information tracking
-

5.5 Attendance

The Attendance module manages daily attendance tracking for students.

Key Features:

- Daily attendance marking
 - Attendance analytics and reports
 - Class-wise attendance tracking
 - Historical attendance visibility
 - Real-time attendance updates
-

5.6 Homework

The Homework module manages assignment creation and evaluation.

Submodules Include:

- Add Homework
- Homework Evaluation

Key Features:

- Homework assignment creation
 - Submission tracking
 - Evaluation and grading
 - Student feedback management
-

5.7 Leave Management

The Leave Management module handles leave requests and approval workflows.

Key Features:

- Leave request submission
 - Approval tracking
 - Leave history management
 - Role-based leave workflows
 - Supporting document management
-

5.8 Fees

The Fees module manages fee setup, collection, discounts, and dues tracking.

Submodules Include:

- Fee Category
- Fee Allocation
- Fee Discount Category
- Add Student Discount
- Fee Collection
- Fee Dues

Key Features:

- Fee structure management
 - Student fee tracking
 - Receipt generation
 - Discount management
 - Due monitoring and reporting
-

5.9 Timetable

The Timetable module manages school scheduling and academic planning.

Submodules Include:

- Working Days
- Sessions
- Class Timetable
- Teacher Timetable
- Teacher Availability

This module helps organize classes, periods, and teacher schedules efficiently.

5.10 Exams

The Exams module manages the complete examination lifecycle.

Submodules Include:

- Exam Types
- Exam Terms
- Set Exam
- View Exams
- Exam Attendance
- Exam Result
- Publish Result
- Class Results
- Attendance History

Key Features:

- Exam scheduling
 - Marks entry and grading
 - Result publishing
 - Class performance analytics
 - Exam attendance management
-

5.11 Messaging

The Messaging module supports communication and announcements across the institution.

Submodules Include:

- SMS Service
- Broadcast Hub
- Announcements
- Gallery
- Events

This module improves communication between administrators, teachers, students, and parents.

5.12 Transport

The Transport module manages school transportation operations.

Submodules Include:

- Bus Registration
- Bus Routes
- Bus Stops
- Bus Fare
- Student Allocation

Key Features:

- Vehicle management
 - Route planning
 - Student transport allocation
 - Fare configuration
 - Transport reporting
-

5.13 Parents

The Parents module manages guardian relationships and parent information.

Submodules Include:

- Parent Management

Key Features:

- Parent profile management
 - Student-parent linking
 - Contact information tracking
 - Parent portal access management
-

5.14 Reports

The Reports module provides operational and academic analytics.

Submodules Include:

- Consolidated Reports
- Finance Reports
- Attendance Reports
- Exam Reports
- Transport Reports
- Fee Reports
- Student Detailed Reports
- Expense vs Income Reports

Key Features:

- Real-time reporting
 - PDF and Excel export support
 - Operational analytics
 - Financial tracking and monitoring
-

5.15 Sports Management

The Sports Management module handles sports activities and student achievements.

Submodules Include:

- Sports Master
- Teams
- Tournaments
- Achievements

Key Features:

- Sports activity management
 - Team organization
 - Tournament scheduling
 - Achievement tracking
-

5.16 Hostel Management

The Hostel Management module manages student accommodation and hostel operations.

Submodules Include:

- Hostel Master
- Room Allocation
- Outpass

Key Features:

- Hostel configuration
- Room assignment tracking
- Student outpass management
- Occupancy monitoring

5.17 Store Management

The Store Management module manages inventory and procurement operations.

Submodules Include:

- Manage Unit
- Manage Category
- Manage Items
- Manage Suppliers
- Stock Purchase
- Item Sale (POS)
- Consumption Report

Key Features:

- Inventory tracking
 - Supplier management
 - Procurement operations
 - Point-of-sale transactions
 - Consumption analytics
-

5.18 Accounts

The Accounts module manages accounting and financial transaction records.

Submodules Include:

- Chart of Accounts
- Ledger Accounts
- Journal Voucher
- Voucher Registry

Key Features:

- Ledger management
 - Financial transaction tracking
 - Accounting workflows
 - Audit and reconciliation support
-

5.19 HR and Payroll

The HR and Payroll module manages staff attendance, salary configuration, and payroll processing.

Submodules Include:

- Session Management
- Staff Attendance
- Pay Heads

- Payment Modes
- Salary Settings
- Advance Salary
- Salary Payment

Key Features:

- Payroll processing
 - Staff attendance tracking
 - Salary structure management
 - Advance salary handling
 - Payment tracking and reporting
-

5.20 Library

The Library module manages library resources and borrowing operations.

Submodules Include:

- Books Inventory
- Issue/Return
- Authors Master
- Publishers Master
- Barcode Generator

Key Features:

- Book inventory management
 - Borrowing and return tracking
 - Author and publisher management
 - Barcode generation for books
 - Library circulation workflows
-
